$\frac{1}{24}$	<div style="border: 1px solid black; width: 100%; height: 15px; display: flex; justify-content: space-between;"></div>
$\frac{1}{12}$	<div style="border: 1px solid black; width: 100%; height: 15px; display: flex; justify-content: space-between;"></div>
$\frac{1}{8}$	<div style="border: 1px solid black; width: 100%; height: 15px; display: flex; justify-content: space-between;"></div>
$\frac{1}{6}$	<div style="border: 1px solid black; width: 100%; height: 15px; display: flex; justify-content: space-between;"></div>
$\frac{1}{4}$	<div style="border: 1px solid black; width: 100%; height: 15px; display: flex; justify-content: space-between;"></div>
$\frac{1}{3}$	<div style="border: 1px solid black; width: 100%; height: 15px; display: flex; justify-content: space-between;"></div>
$\frac{1}{2}$	<div style="border: 1px solid black; width: 100%; height: 15px; display: flex; justify-content: space-between;"></div>
$\frac{2}{12}$	<div style="border: 1px solid black; width: 100%; height: 15px; display: flex; justify-content: space-between;"></div>
$\frac{2}{6}$	<div style="border: 1px solid black; width: 100%; height: 15px; display: flex; justify-content: space-between;"></div>
$\frac{2}{8}$	<div style="border: 1px solid black; width: 100%; height: 15px; display: flex; justify-content: space-between;"></div>
$\frac{2}{4}$	<div style="border: 1px solid black; width: 100%; height: 15px; display: flex; justify-content: space-between;"></div>
$\frac{3}{24}$	<div style="border: 1px solid black; width: 100%; height: 15px; display: flex; justify-content: space-between;"></div>
$\frac{4}{24}$	<div style="border: 1px solid black; width: 100%; height: 15px; display: flex; justify-content: space-between;"></div>
$\frac{6}{24}$	<div style="border: 1px solid black; width: 100%; height: 15px; display: flex; justify-content: space-between;"></div>
$\frac{3}{6}$	<div style="border: 1px solid black; width: 100%; height: 15px; display: flex; justify-content: space-between;"></div>
$\frac{4}{12}$	<div style="border: 1px solid black; width: 100%; height: 15px; display: flex; justify-content: space-between;"></div>
$\frac{4}{8}$	<div style="border: 1px solid black; width: 100%; height: 15px; display: flex; justify-content: space-between;"></div>
$\frac{4}{6}$	<div style="border: 1px solid black; width: 100%; height: 15px; display: flex; justify-content: space-between;"></div>
$\frac{2}{3}$	<div style="border: 1px solid black; width: 100%; height: 15px; display: flex; justify-content: space-between;"></div>
$\frac{8}{24}$	<div style="border: 1px solid black; width: 100%; height: 15px; display: flex; justify-content: space-between;"></div>
$\frac{6}{12}$	<div style="border: 1px solid black; width: 100%; height: 15px; display: flex; justify-content: space-between;"></div>
$\frac{3}{4}$	<div style="border: 1px solid black; width: 100%; height: 15px; display: flex; justify-content: space-between;"></div>
$\frac{12}{12}$	<div style="border: 1px solid black; width: 100%; height: 15px; display: flex; justify-content: space-between;"></div>
$\frac{8}{12}$	<div style="border: 1px solid black; width: 100%; height: 15px; display: flex; justify-content: space-between;"></div>
$\frac{9}{12}$	<div style="border: 1px solid black; width: 100%; height: 15px; display: flex; justify-content: space-between;"></div>
$\frac{8}{8}$	<div style="border: 1px solid black; width: 100%; height: 15px; display: flex; justify-content: space-between;"></div>
$\frac{12}{24}$	<div style="border: 1px solid black; width: 100%; height: 15px; display: flex; justify-content: space-between;"></div>
$\frac{16}{24}$	<div style="border: 1px solid black; width: 100%; height: 15px; display: flex; justify-content: space-between;"></div>
$\frac{2}{2}$	<div style="border: 1px solid black; width: 100%; height: 15px; display: flex; justify-content: space-between;"></div>
$\frac{6}{8}$	<div style="border: 1px solid black; width: 100%; height: 15px; display: flex; justify-content: space-between;"></div>

I) Pour chacun des 30 schémas ci-contre, hachurez ou coloriez la fraction du rectangle indiquée à sa gauche **en commençant par la gauche et sans laisser de cases « vides »**.

II) Vous avez probablement remarqué que dans certains cas, vous avez colorié la même « partie » du rectangle ; par exemple pour $\frac{1}{8}$ et $\frac{3}{24}$. Dans ce cas les fractions $\frac{1}{8}$ et $\frac{3}{24}$ sont **égales**.

Et nous écrivons : $\frac{1}{8} = \frac{3}{24}$.

De la même façon, complétez :

$$\frac{1}{6} = \frac{\dots}{\dots} = \frac{\dots}{\dots} ;$$

$$\frac{1}{4} = \frac{\dots}{\dots} = \frac{\dots}{\dots} ;$$

$$\frac{1}{3} = \frac{\dots}{\dots} = \frac{\dots}{\dots} = \frac{\dots}{\dots} ;$$

$$\frac{1}{2} = \frac{\dots}{\dots} = \frac{\dots}{\dots} = \frac{\dots}{\dots} = \frac{\dots}{\dots} = \frac{\dots}{\dots} ;$$

$$\frac{4}{6} = \frac{\dots}{\dots} = \frac{\dots}{\dots} = \frac{\dots}{\dots} ;$$

$$\frac{3}{4} = \frac{\dots}{\dots} = \frac{\dots}{\dots} ;$$

$$\frac{12}{12} = \frac{\dots}{\dots} = \frac{\dots}{\dots} .$$

En fait, lorsqu'on connaît une fraction, il est facile **sans faire de schéma** de trouver beaucoup de fractions qui lui sont égales.

Cherchez comment, puis répondez à la question suivante :

Trouvez **toutes** les fractions égales à $\frac{16}{20}$ dont le dénominateur est inférieur à 100... Attention ! Il y en a 18 !
